Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Previously presented): A computer implemented method of sharing information among members of a group, the method comprising:

storing information about more than one current member of a group in a database; receiving instructions from at least one current member to invite at least one prospective member to join the group;

sending an invitation to the prospective member to join the group;

receiving a response from the prospective member;

adding the prospective member to the group as a new member based upon receipt of an affirmative response; and

automatically updating services to current members to account for the new member.

- 2. (Original): The computer implemented method of claim 1 wherein sending the invitation comprising using an e-mail message.
- 3. (Original): The computer implemented method of claim 1 wherein sending the invitation comprises using an instant message.
- 4. (Original): The computer implemented method of claim 1 wherein sending the invitation comprises using an on-line chat room.
- 5. (Previously presented): The computer implemented method of claim 1 wherein receiving the response comprises receiving the response as an e-mail message.

Serial No.: 09/810,625 Filed: March 19, 2001

6. (Previously presented): The computer implemented method of claim 1 wherein receiving the response comprises receiving the response as an instant message.

- 7. (Previously presented): The computer implemented method of claim 1 wherein receiving the response comprises receiving the response in an on-line chat room.
- 8. (Previously presented): The computer implemented method of claim 1, wherein automatically updating services comprises providing a list of current members that includes the new member.
- 9. (Original): The computer implemented method of claim 1 wherein automatically updating services comprises providing information in an address book that includes address information for the new member.
- 10. (Original): The computer implemented method of claim 9 further comprising updating the address book based upon information entered by the current members of the group.
- 11. (Original): The computer implemented method of claim 1 wherein automatically updating services comprises providing information in a calendar that includes information for the new member.
- 12. (Original): The computer implemented method of claim 11 further comprising updating the calendar based upon information entered by the current members of the group.
- 13. (Original): The computer implemented method of claim 11 further comprising inviting current group members to attend an event and automatically recording the event in the calendar.

Serial No.: 09/810,625 Filed: March 19, 2001

14. (Original): The computer implemented method of claim 1 wherein automatically updating services comprises providing an on-line forum for current members of the group to chat with other current members of the group including the new member.

- 15. (Original): The computer implemented method of claim 1 wherein automatically updating services comprises enabling current members of the group to send instant messages to other current members of the group including the new member.
- 16. (Previously presented): The computer implemented method of claim 1 wherein automatically updating services comprises enabling current members of the group to share data files with other current members of the group including the new member.
- 17. (Previously presented): The computer implemented method of claim 16 wherein the data files are provided by the current members of the group.
- 18. (Original): The computer implemented method of claim 16 wherein data files comprise digital images.
- 19. (Original): The computer implemented method of claim 16 wherein data files comprise photographs.
- 20. (Original): The computer implemented method of claim 16 wherein data files comprise text files.
- 21. (Original): The computer implemented method of claim 16 wherein data files comprise multi-media files.

Serial No.: 09/810,625 Filed: March 19, 2001

22. (Previously presented): The computer implemented method of claim 1 further comprising offering new services based upon the current members of the group including the new member.

- 23. (Previously presented): The computer implemented method of claim 1 wherein automatically updating services comprises providing information in an instant messaging buddy list that includes information for the new member.
- 24. (Currently amended): A communication system for sharing information among members of a group comprising:
 - a group administrator for processing information about the current members of the group;
- a group communicator cooperating with the group administrator for delivering and exchanging information with current and prospective group members; and
- a group information updater cooperating with the group communicator and group administrator for providing automatically updated services to current members including a new member, wherein in response to an affirmative response to an invitation to a prospective member to join the group, the group information updater is instructed by the group communicator to add the prospective member to the group.
- 25. (Previously presented): The communication system of claim 24 wherein the group administrator further comprises:
- a group member profile server for updating data related to current members including the new member; and
- a database connected to the group member profile server for storing data related to current members including the new member.
- 26. (Previously presented): The communication system of claim 24 wherein the group communicator further comprises:

an instant message host in communication with a client system; and

a login server in communication with a client system and the instant message host for determining whether the client is authorized to access the instant message host.

27. (Previously presented): The communication system of claim 26 wherein the instant message host further comprises:

an instant message server for sending and receiving data; and a domain server cooperating with the instant message server for providing supporting functions of the instant message host.

- 28. (Previously presented): The communication system of claim 27 wherein the instant message host further comprises a routing gateway connected to the instant message server.
- 29. (Previously presented): The communication system of claim 24 wherein the group communicator further comprises:

an Online Service Provider host in communication with a client system; and a login server in communication with the client system and the Online Service Provider host for determining whether the client is authorized to access the Online Service Provider host.

- 30. (Previously presented): The communication system of claim 26 wherein the Online Service Provider host further comprises an Online Service Provider server for sending and receiving data.
- 31. (Previously presented): The communications system of claim 24 wherein the group information updater further comprises a user interface for communicating and exchanging data with one or more members of the group including the new member.

Serial No.: 09/810,625 Filed: March 19, 2001

32. (Previously presented): The communications system of claim 31 wherein the user interface resides on an Online Service Provider host.

- 33. (Original): The communications system of claim 31 wherein the user interface resides on the Internet.
- 34. (Previously presented): A graphical user interface for inviting a prospective member of a group to join the group, the graphical user interface comprising:

an invitation for the prospective member to join the group;

a name of the group;

a list of one or more current members of the group;

and a tool for the prospective member to respond to the invitation.

35. (Previously presented): A computer program, stored on a computer readable medium, comprising instructions for:

storing information about more than one current member of a group in a database;

receiving instructions from at least one current member to invite at least one prospective member to join the group;

sending an invitation to the prospective member to join the group;

receiving a response from the prospective member;

adding the prospective member to the group as a new member based upon receipt of an affirmative response; and

automatically updating services to current members to account for the new member.

36. (Original): The computer program of claim 35 wherein the computer readable medium is a disc.

Serial No.: 09/810,625 Filed: March 19, 2001

37. (Original): The computer program of claim 35 wherein the computer readable medium is a client device.

- 38. (Original): The computer program of claim 35 wherein the computer readable medium is a host device.
- 39. (Original): The computer program of claim 35 wherein the computer readable medium is a propagated signal.
- 40. (Previously presented): The method of claim 1 in which the current members of the group comprise members of a family.
- 41. (Previously presented): The method of claim 1 in which the prospective member comprises a relative of a current member of the group.
- 42. (Previously presented): The method of claim 1 in which storing information about all members of a group comprises storing information about all members of a private group.
- 43. (Previously presented): The method of claim 1 in which storing information about all members of a group comprises storing information about all members of a public group.
- 44. (Previously presented): The method of claim 1 wherein the invitation comprises a personalized message to the prospective member.
- 45. (Previously presented): The method of claim 1 further comprising authorizing an invitation to be sent to the prospective member.

Serial No.: 09/810,625 Filed: March 19, 2001

46. (Previously presented): The method of claim 45 in which the authorizing is performed by a group founder.

- 47. (Previously presented): The method of claim 45 in which the authorizing is performed by a group owner.
- 48. (Previously presented): The method of claim 1 further comprising deleting a current member.
- 49. (Previously presented): The method of claim 48 in which the deleting is performed by a group founder.
- 50. (Previously presented): The method of claim 48 in which the deleting is performed by a group owner.
- 51. (Previously presented): The method of claim 1 further comprising promoting a current member to a group owner.
- 52. (Previously presented): The method of claim 1 further comprising denoting a group owner to a current member.
- 53. (Previously presented): The method of claim 1 further comprising promoting a group owner to a founder.
- 54. (Previously presented): The method of claim 1 further comprising providing a notification of the response to one or more current members.

Serial No.: 09/810,625 Filed: March 19, 2001

Page : 10 of 16

55. (Previously presented): The method of claim 1 further comprising treating the new member as a current member.
